## Longhouse Trading is Expanding

As many producers are closing their doors Longhouse is expanding. We have added production capacity. At the end of 2008 we purchased two new 25/mfbm charge B. Hildebrand kilns and a new 1-6 head Weinig Moulder. This means that we have covered all aspects of producing our custom products. From cutting the raw logs to drying, planing, staining and even pre drilling.

At the beginning of March we launched our new website. As well as a fresh new layout we expanded our products section with more details and pictures. We have updated our new projects and we have added a section on our environmental stewardship. Check out [www.longhousecedar.com](http://www.longhousecedar.com)

As always we are committed to customer service and satisfaction. We have added a new Sales and Marketing Director in Saskatchewan ([d.drobot@sasktel.net](mailto:d.drobot@sasktel.net)) and new Sales and Marketing Director ([moriah@longhousecedar.com](mailto:moriah@longhousecedar.com)) to help serve you better.

## Introducing Our Pre-finished Flooring

Longhouse Trading is now making Douglas-fir pre-finished wood flooring in addition to our standard unfinished wood flooring.

- 3 ¼", 5 ¼" and 7 ¼" widths
- 3 colors to choose from
- Clear or Rustic Grade
- Random Lengths 3'-8'
- long lengths as requested.
- Available FSC-certified

## Longhouse Trading is FSC-certified

Longhouse Trading has always been committed to environmental stewardship. We are long standing members of the South Island Woodlot Association. In 2007 we joined other environmental leaders and became FSC (Forest Stewardship Council) certified. We can now produce most of our products as FSC-certified upon request. Our products can contribute to Green building programs such as LEED® in both the US and Canada and “BuiltGreen” programs across North America.
